The Science of Road Safety

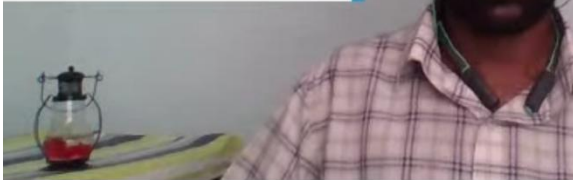

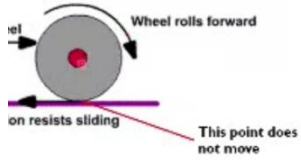

The P G Department of Physics, Sree Narayana College, Sivagiri, Varkala organized an invited talk on "The Science of Road safety" on 09th March 2021 at 7.00 pm. The session was hosted in the presence of invited guest, Dr. Vaishakan Thampi D S, teachers of the department Shri. Sajesh Sasidharan, Ms. Venas C L, Sri. Jyothish Babu and Dr. Raji R. Dr. Raji R, Assistant Professor, Department of Physics, welcomed everyone to the seminar. The invited chief guest Dr. Vaishakan Thampi D S, Assistant Professor, M G College, Thiruvananthapuram delivered an excellent talk on the topic "The Science of Road Safety". He gave a deep insight into the physics behind the motion of vehicles through examples. He expressed his views on how road accidents in India increase and how can reduce these accidents by knowing the physics behind the motion of vehicles. He stated that, by knowing the different kinds of frictional force acting between the road and the tyre, we can drive vehicles safely. Through daily life experiences, he established his idea of the frictional force on road safety. It was indeed a great presentation and it has certainly sparked some true debates on the topic. There was an active participation of 46 students from the Department of Physics. The debate laid the foundation for the young minds of students about the need for studying physics and how can analyse the situations that occur in our daily life from a physics point of view. Miss. Varsha R Nair, I BSc Physics student proposed vote of thanks.
