DEPARTMENT OF ZOOLOGY

Detailed report 2020-2021

Field Visit

BEE KEEPING CENTRE, HORTICORP, MAVELIKKARA

Final year BSc. Zoology students have a paper named Vermiculture and Apiculture in their sixth semester. Department took initiative to provide a training cum workshop on Apiculture techniques. On 22-03-2021 we arranged an institution visit and workshop about bee keeping techniques at Bee Keeping Centre, HortiCorp, Mavelikkara. 36 students participated in the training. Regional manager of the centre was very much interested in giving training to teachers and students. After having a formal inaugural session the class began. Through the use of PowerPoint presentation the resource person made the class very interesting. After the class they arranged a hands on training to manage apiaries, bees and collection of honey and identification of different bees and hives. Different types of hives and equipment used in apiculture were also demonstrated. In the last session of the workshop the trainers explained the different stages and machinery used in the processing of honey. It was a really fruitful and highly informative field to know about.

Awareness Class on Apiculture

Workshop on "Apiculture"

Awareness class on Honey Processing
